

Suppliance GmbH

The slightly different IT service provider

Suppliance is an independent international IT platform consisting of experienced and competent IT service partners.

We are specialized in placement of IT specialists and support our customers when implementing project plans in the entire IT sector.

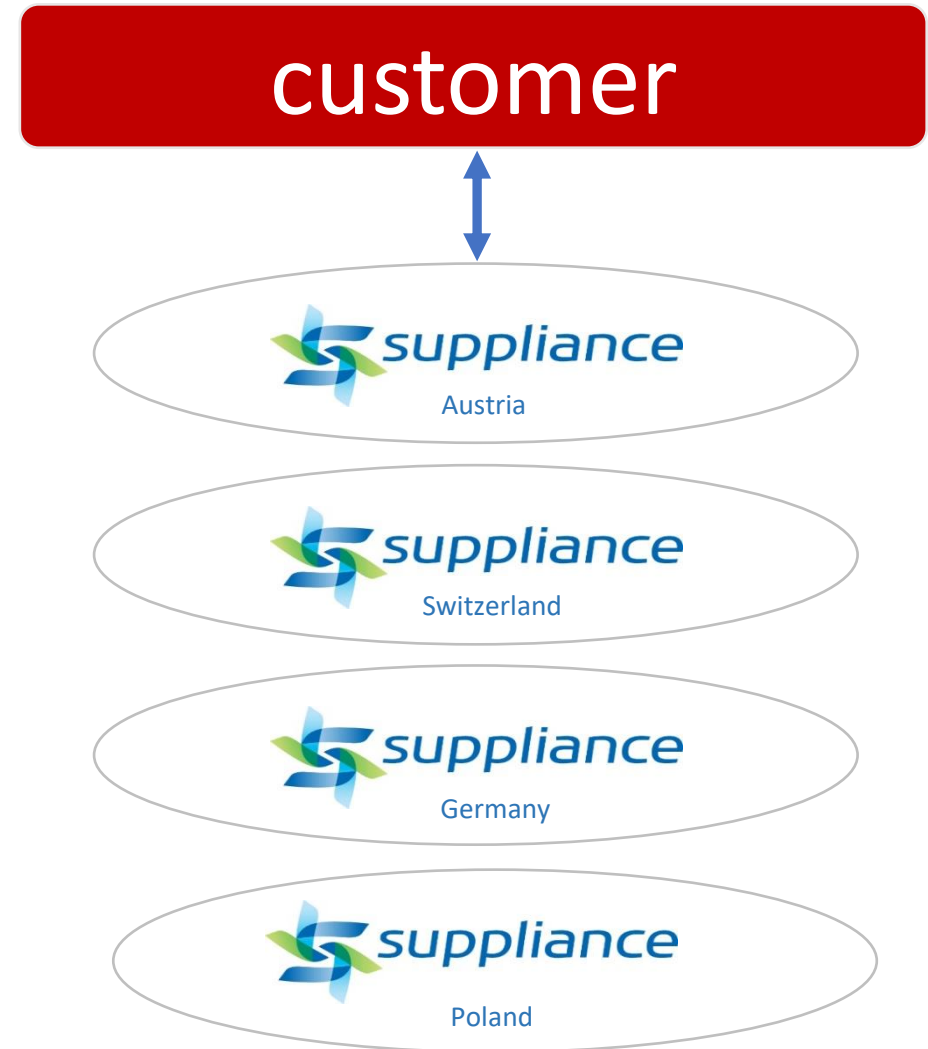

INTERNATIONAL LOCATIONS

Suppliance GmbH acts for you as a group of companies together with Suppliance Switzerland and Suppliance Germany in the entire Europe region, as well as with Suppliance Poland.

With us being your supplier you have the opportunity to access know-how and the capacities of more than 400 partners from the suppliance network.

PERSONAL MANAGEMENT

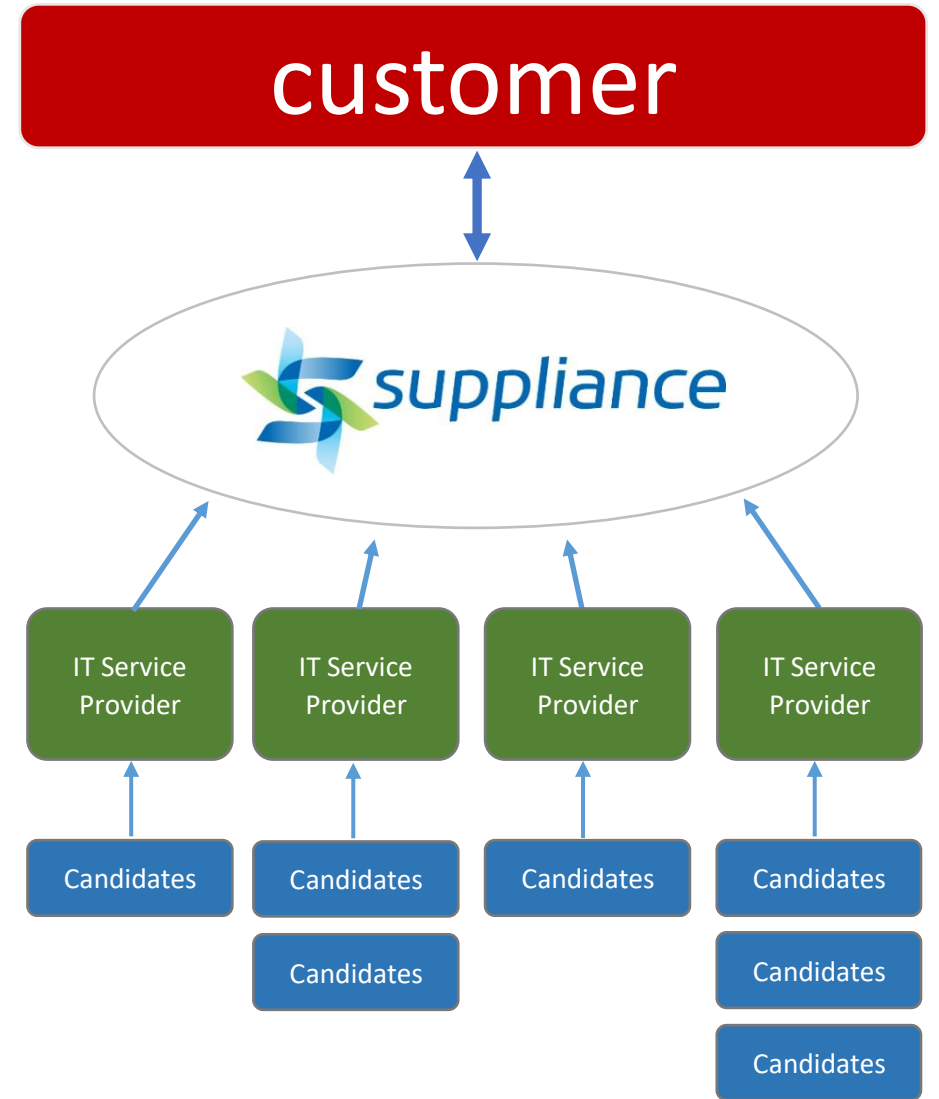

We have more than 30 years of expertise in personal consulting. But we are not a personnel service provider with its own candidate database, in the common sense.

We cooperate with a professional network of IT service providers (contractual partners) and can therefore offer a wider range of candidates.

We provide you as ONE SUPPLIER with:

- ONE framework agreement
- ONE contact and
- ONE billing partner

Consequently, your biggest benefits are uniformity, transparency and simplification of administrative processes.

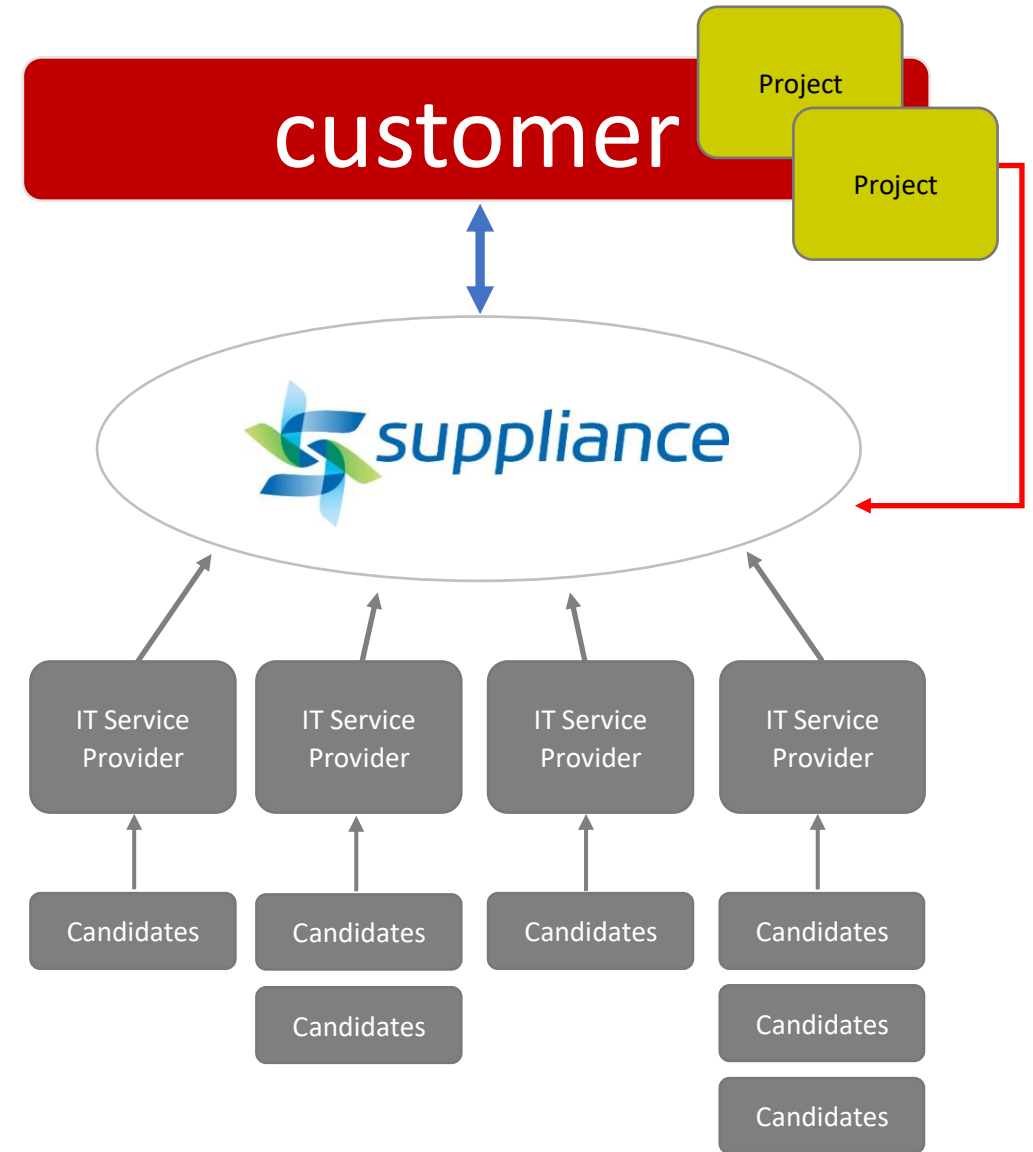

PROJECT MANAGEMENT

Our main goals are to plan and control projects correctly to minimize risk, but also to achieve project goals on schedule in budget on a high-quality standard.

We support you through the responsible takeover of new, existing or partial projects and carry them out on your behalf.

Our Services:

- Complete or partial project implementation
- Consulting
- Project staffing
- Test and quality management
- Product development

RANGE OF SERVICES

Suppliance offers you a wide variety of candidates from a broad range of disciplines.

We would be delighted to advise you in detail personally about your options for potential candidate support.

PARTNERS - Building trust through transparency

We consciously cultivate the foundation of trust and create a long-term basis for everyone involved through a transparent flow of information.

Those IT service companies that would like to work with a reliable partner:

- Companies with extensive experience
- Companies with special know-how in certain areas
- Companies that are looking for a good partner to take over sales for them
- Companies that would also like to serve large customers with us
- Individual and startup companies
